Course Effectiveness

an Atrium EMS™ application

Atrium Management Solutions Inc.

Save time and money in processing evaluations to spot potential risks and improve quality. Gain strategic insight into the strengths and weaknesses of an entire program area. Use student feedback to anticipate needs for augmented instructional resources and methods.

Benefits

- Evaluate how well a course meets its objectives.
- Get focused feedback on student satisfaction levels.
- Determine the effectiveness of an instructor across a range of courses.
- Gain insights on strengths and weaknesses in course content.
- Analyze learning effectiveness within the class environment.

Use for

- Increasing market penetration by tuning a course.
- Improving communication with students.
- Assessing the successfulness of a course.
- Developing better instructor effectiveness.
- Understanding student-centred needs and expectations.
- Adjusting/revising course curricula for a market segment.

Product Features

- Easy to use Internet application, available worldwide.
- Quick-to-implement insightful methodology.
- Customizable criteria and question database.
- Unlimited number of assessments per course.
- Clear, “drill-down” reporting with multi-dimensional perspectives.
- Secure data transport, processing and storage.
